CareDesk Capstone

Clinic appointment SaaS ? laptop to EKS

Tech Stack

React, FastAPI, Postgres, Docker, Actions, Trivy, Terraform, Helm, Prometheus

Architecture

Ingress/Nginx -> Frontend + /api Backend -> PostgreSQL; /metrics -> Prometheus

CI/CD

pytest -> build -> Trivy -> GHCR SHA tags -> optional Helm deploy

Terraform

VPC, public/private subnets, NAT, EKS node group in ap-south-1

Kubernetes

Helm chart: deployments, services, ingress, HPA, ServiceMonitor, Argo CD

Observability

Prometheus UP targets + Grafana HTTP rate/latency panels

Learnings

Quality gates, SHA traceability, label selectors, destroy AWS after demo
